
Wilco Restoration

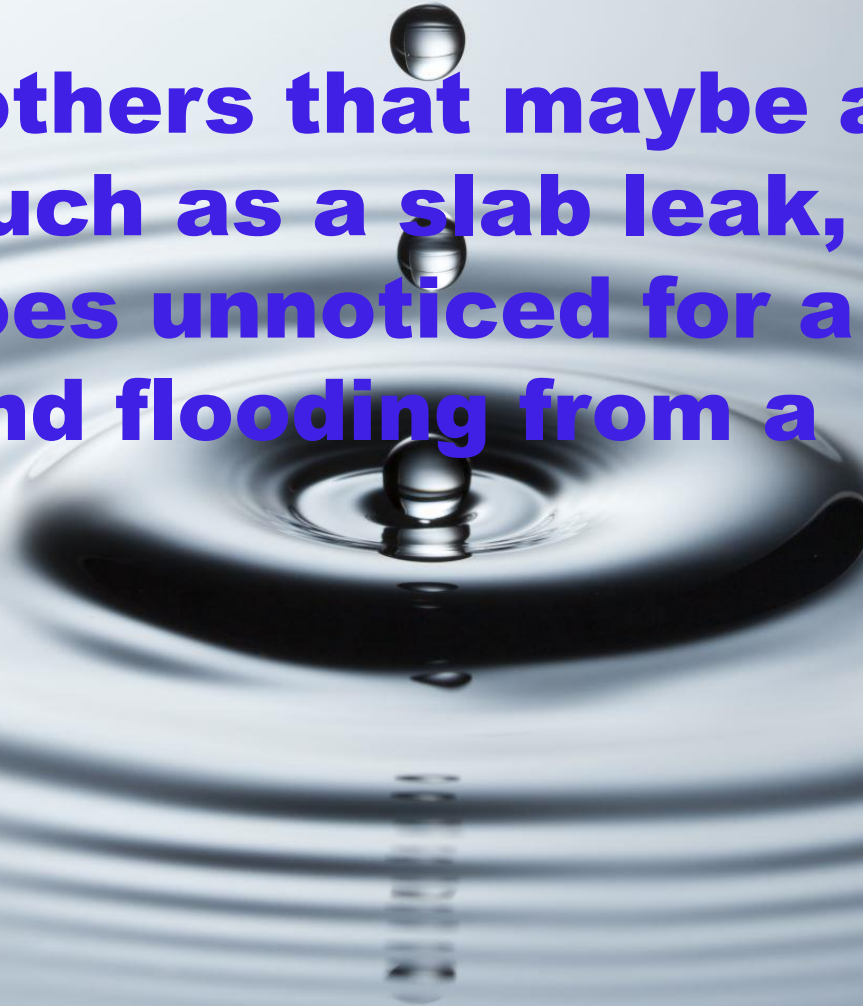

Your community partner in water,
mold and fire damage.

We are here to help you through
the process as quickly and
efficiently as possible.

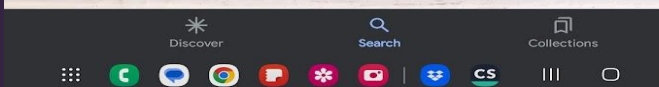

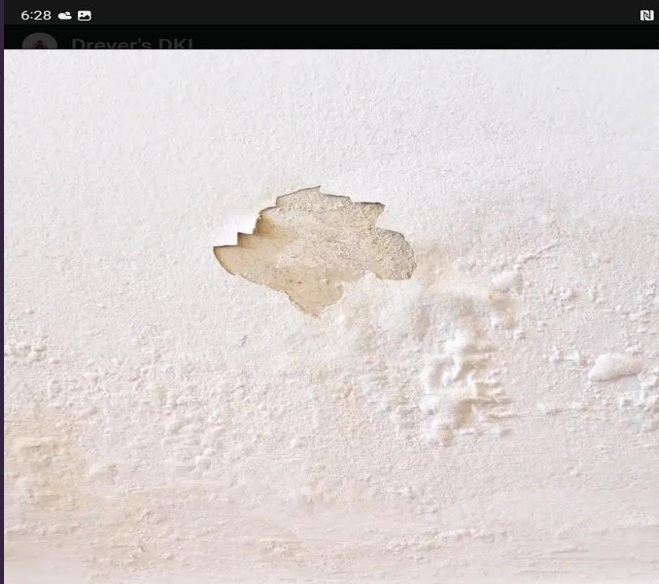

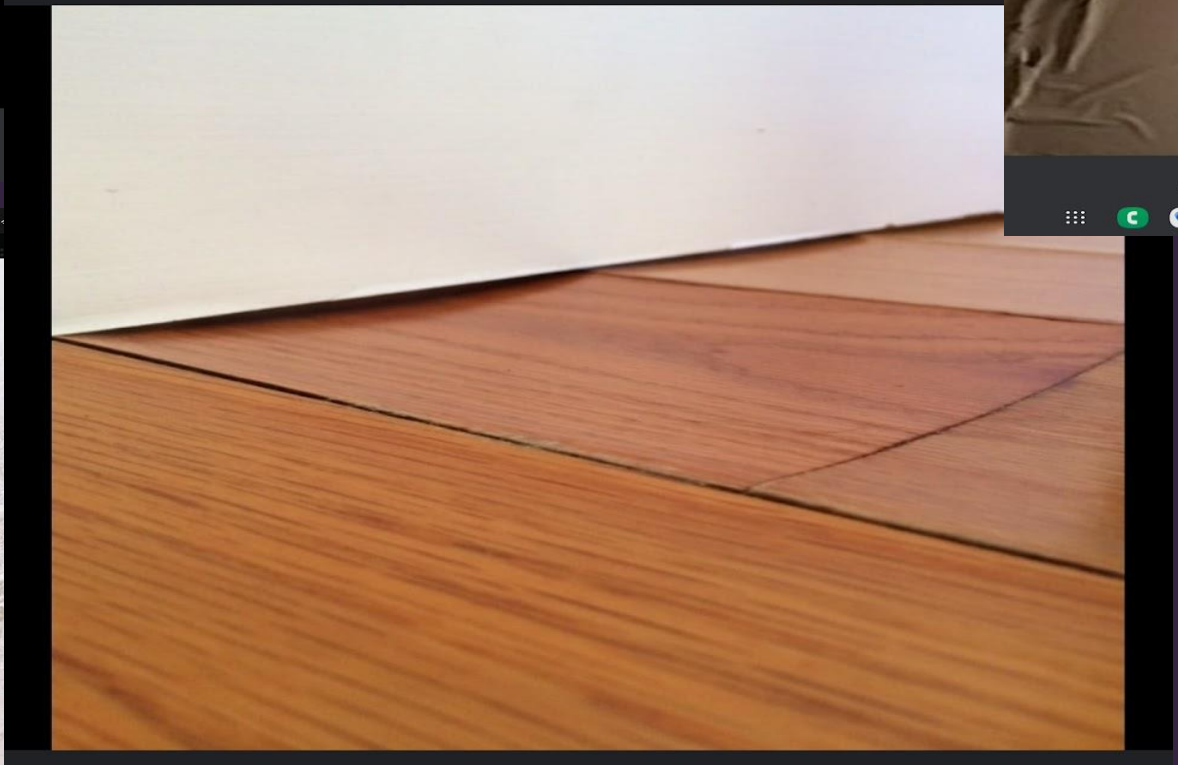

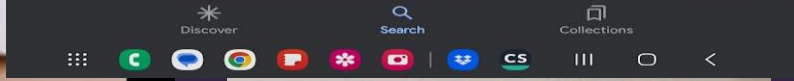

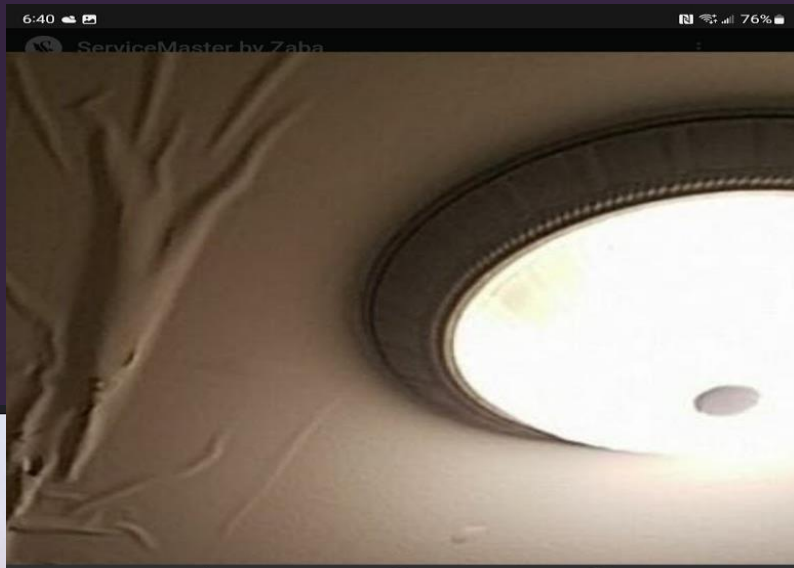

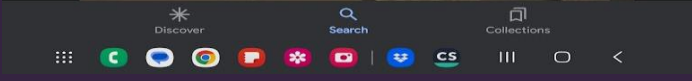

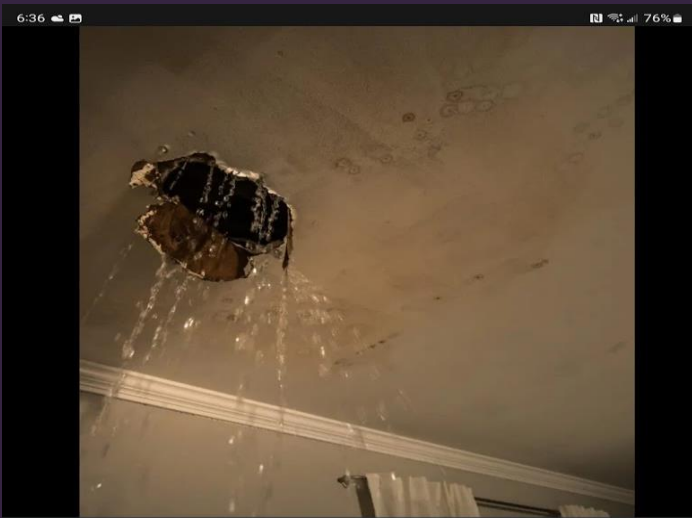

Cause can be from something as simple as toilet overflow, a hot water leak.

Then there are others that maybe a little more complex such as a slab leak, a roof leak that goes unnoticed for a period of time and flooding from a storm.

Examples of water damage

When you neglect a water damage it causes mold. It is only a matter of time. The hot water heat that has been neglected is a prime source not only for a Water damage, but also mold growth as seen here.
